DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 27-52, drawn to a subcombination container transport assembly.

Group II, claim(s) 53-75, drawn to a combination container assembly process.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Invention II and invention I are related as combination and subcombination. The combination as recited does not require the particulars of the subcombination device because at least a coupling per se and/or a layer of containers as such are not required. The subcombination has separate utility such as use in a combination not requiring at least folding to a greatly reduced volume as such.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Container/assembly species of figures 1 and 2 vs figure 5 vs figure 9.

Additionally election between the coupler subspecies of figure 6A vs figure 8A vs figure 13 is required.

Art Unit: 3612

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

At least claim 1 appears to be generic.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
The defined container/assembly species are of sufficiently divergent structure so as to warrant the requirement – e.g. the collapsible open top platforms of figure 9 are significantly different than the box-shaped containers of figures 1+. Additionally, the defined coupler subspecies are of significantly different construction so as to warrant the requirement – e.g. note the bolt assembly with surrounding spring of figures 6A+ and the pivoting lever construction of figures 8A+.

6. Due to the complexity of the above restriction/election, the requirement is being submitted to applicant in written form to allow ample time to address the issues raised.

Art Unit: 3612

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
